**Independent Auditor's Report on the Review of the Condensed Consolidated Interim
Financial Information**

**To the General Assembly of
Arab Phoenix Holdings Company
(Previously Taameer Jordan Holdings)
(Public Shareholding Company – Holding Company)
And its subsidiaries (the group)
Amman – Jordan**

We have reviewed the accompanying condensed consolidated interim statement of financial position of **Arab Phoenix Holdings Company (Public Shareholding Company – Holding Company) and its subsidiaries (“the Group”)**, as at June 30, 2017 and the related condensed consolidated interim statements of profit or loss and other comprehensive income, changes in shareholders' equity and cash flows for the six months period then ended. Management is responsible for the preparation and fair presentation of this condensed consolidated interim financial information in accordance with International Accounting Standard number (34) “Interim Financial Reporting”. Our responsibility is to express a conclusion on this condensed consolidated interim financial information based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements (2410) “Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A review of condensed consolidated interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for qualified conclusion

- Trade receivables and other debit balances, trade payables and other credit balances, and advance payments received against sales in the condensed consolidated interim financial information include balances with an approximate amount as of June 30, 2017 JOD 2,6 Million (December 31, 2016: JOD 2,6 Million), JOD 2,9 Million (December 31, 2016: JOD 2,9 Million) and JOD 12,1 Million (December 31, 2016: JOD 12,5 Million), respectively for which we did not receive confirmations and we were unable to obtain sufficient and appropriate review evidence through the performance of alternative review procedures to verify the existence, accuracy and the recoverability of these balances, knowing that management has taken action to reduce the unconfirmed balances by an approximate amount of JOD 7,5 million during the year 2016, furthermore we have been informed by the Group's management that there are no sufficient information available in relation to these balances up to date and that management is in the process to secure these information, therefore we can't determine whether any necessary adjustments are required to the condensed consolidated interim financial information.

Qualified Conclusion

Based on our review and except for the possible effects of what is mentioned in the basis of qualified conclusion paragraph above, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial information does not present fairly all material respects the condensed consolidated interim financial position of **the group** as of June 30, 2017 and its condensed consolidated interim financial performance and its condensed consolidated interim cash flow for the period then ended, in accordance with International Accounting Standard number (34) "Interim Financial Reporting".

Emphasis of matter paragraph

Without further qualifying our conclusion, we draw attention to note (16) which states that there are restrictions over the Group's movable and immovable funds due to lawsuits raised against the Group by the local Jordanian Courts for the benefit of different parties, also the Group accumulated losses reached JOD 33 Million as of June 30, 2017, equivalent to 38% of the group capital (December 31, 2016 : JOD 32,6 Million), in addition to a deficit in the Group's working capital with an approximate amount of JOD 23,9 Million (December 31, 2016 : JOD 23.6 Million). In addition the accumulated losses for some of the subsidiaries companies exceeded its paid up capital as of June 30, 2017. These conditions indicate the existence of a material uncertainty that may cast significant doubt about the Group's ability to continue as a going concern, however the Group complied with the most of 2016 future plan items to handle the above conditions and to ensure the Group's continuity, the group has provided us with its plan for the year 2017 for the same objective as stated on Note (17), accordingly management has prepared the condensed consolidated interim financial information on the going concern basis.

The results of the subsidiary are consolidated in the consolidated statement of profit or loss and other comprehensive income at the date of acquisition, which is the date that actual control is obtained over the subsidiary.

The parent company controls subsidiaries when it is exposed, or has rights, to variable returns from its involvement with these subsidiaries and has the ability to affect those returns through its power over these subsidiaries.

Thus, the principle of control sets out the following three elements of control:

- 1- Power over the investee.
- 2- Exposure, or rights, to variable returns from its involvement with the investee; and
- 3- The ability to use power over the investee to affect the amount of the investor's returns.

The parent company should reassess whether it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired. Any goodwill that arises is tested annually for impairment.

Any gain on bargain purchases is recognized in statement of profit or loss and other comprehensive income immediately. Transactions costs are expensed as incurred, except if related to the issue of debt or securities.

The consideration transferred does not include amounts related to the settlement of pre-existing relationship. Such amounts are generally recognized in consolidated statement of profit or loss and other comprehensive income.

Any contingent consideration payable is measured at fair value at the acquisition date. If the contingent consideration is classified as equity, then it is not re-measured and settlement is accounted for within equity. Otherwise, subsequent changes in the fair value of the contingent consideration are recognized in consolidated statement of profit or loss and other comprehensive income.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. This means that no gain or loss from these changes should be recognized in profit or loss. It also means that no change in the carrying amounts of the subsidiary's assets (including goodwill) or liabilities should be recognized as a result of such transactions

On loss of control, the parent-subsidiary relationship ceases to exist. The parent no longer controls the subsidiary's individual assets and liabilities. Therefore, the parent company:

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL INFORMATION

- 1- Derecognizes the assets and liabilities of the former subsidiary from the consolidated statement of financial position.
- 2- Recognizes any investment retained in the former subsidiary at its fair value when control is lost and subsequently accounts for it and for any amounts owed by or to the former subsidiary in accordance with relevant IFRSs.
- 3- Recognizes the gain or loss associated with the non-controlling interest.

Consolidated financial statements are prepared for the subsidiaries to the same financial year of the parent company and using the same accounting policies adopted by the parent company. If one of the subsidiary use accounting policies other than those adopted in the consolidated financial statements for similar transactions and events in similar circumstances, appropriate adjustments are made to that Group subsidiary's financial statements, in preparing the consolidated financial statements to ensure conformity with the International Financial Reporting Standards.

Non-controlling interest are measured at their proportionate share of the acquirer's identifiable net assets at the acquisition date.

Balances, transactions and unrealized profits and expenses resulted from transactions within the group are eliminated when preparing these consolidated financial statement.

(c) Use of estimates

- These condensed consolidated interim financial information have been prepared in accordance with IAS 34, "interim financial reporting" which requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.
- In preparing these condensed consolidated interim financial information for the six months ended on June 30, 2017, significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended December 31, 2016.

3) Significant Accounting Policies

The accounting policies applied by the Group in these condensed consolidated interim financial statements for the six months ended 30 June 2017 are the same as those applied by the Group in its consolidated financial statements for the year ended December 31, 2016, except for the following International Financial Reporting Standards effective starting from January 1, 2017:

Amendments to IAS (7).

Annual improvements to the International Financial Reporting Standards for the 2014-2016 cycles.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL INFORMATION

The Group's management plan to address the going concern indicators are summarized as follows:
The Group succeeded during the year 2016 in achieving the balance between three streams starting with the completion of current projects, payments for parts of the financial commitments to different parties through legal settlements and reconciliations which resulted in releasing parts of the reservations over the Group assets, and last stream was through the payment of all related administrative commitments and expenses necessary for the continuation of company's operations.

The Group was able to secure the needed cash for the above streams through the liquidation of part of assets owned by the Group and its subsidiaries in addition to collection part from the due receivables from Al- Andalusia clients.

As for the year 2017, The Group will focus on its core business which is the "Real Estates Development" and limit its vertical integration and prepare it for the coming growth period through two main directions:

First: Moving to the full operational mode and the continuation of current projects to make the current projects as the main cash generating sources to finance the current and future Group projects.

Second: Continue in settling debts and removing reservations and restrictions over the Group assets.

As for the plan, it is summarized in the following:

- Al- Andalusia project: continue and deliver what is left of project villas and collect the receivables from the clients.
- Zarqa project: after the continuation of phase one and starting the selling process, 2017 main target is to continue finishing up to 40% of the project.
- Red Sea project: continue finishing phase 1 of the project and delivering the sold villas to its owners and collect the related remaining receivables, in addition to start the completion and finalizing of phase 2.
- Developing and selling of land plots owned by Taameer and its subsidiaries.
- Selling of assets that are not useful any more to the Group and use the cash generated in the above main streams.
- Start the horizontal growth through the study of new projects inside and outside of Jordan.

18) FINANCIAL RISK MANAGEMENT

Market price risk

Equity price risk arises from financial assets at fair value through other comprehensive income that is held to meet the partially unfunded portion of the Group's liabilities as well as investments at fair value through statement of income. The group's management monitors the debt and securities portfolio in its market-based investment portfolio. Material investments are managed in the portfolio on an individual basis and the Risk Management Committee approves all purchase and sale decisions.

Fair value hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)

Prices quoted in active markets for similar instruments or through the use of valuation model that includes inputs that can be traced to markets, these inputs good be defend directly or indirectly.

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).
